

Classroom One Disassembly and Assembly Guide

Classroom One Disassembly and Assembly Guide

Note: Due to it's weight, all disassembly an assembly of the Classroom One must be carried out with the unit stood up right on it's base.

LCD Screen Module Removal

1. Remove 2 x Security Screws from LCD Screen Module/Hinge Cover Panel, (**Fig 1**). Screen Module/Hinge Cover removed, (**Fig's 2**).

Classroom One Disassembly and Assembly Guide

Internal Module Access and Replacement

6. Remove 3 x Security Screws from the Cave Door and 2 x Security Screws from the Rear Cover Panel, (**Fig 7**) and (**Fig 8**). Remove Cave Door and Rear Cover Panel.

Fig 7

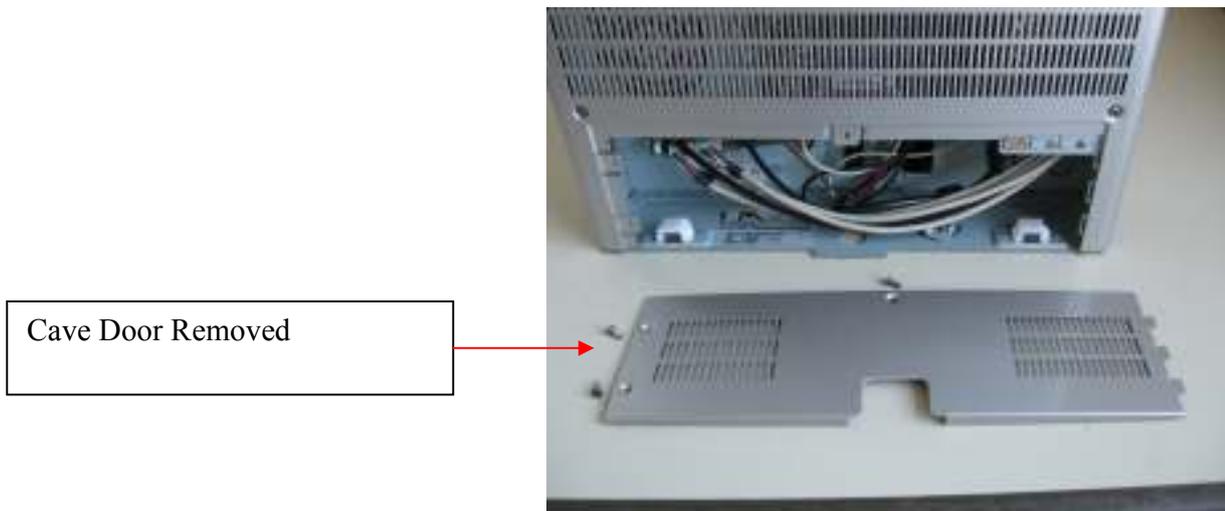

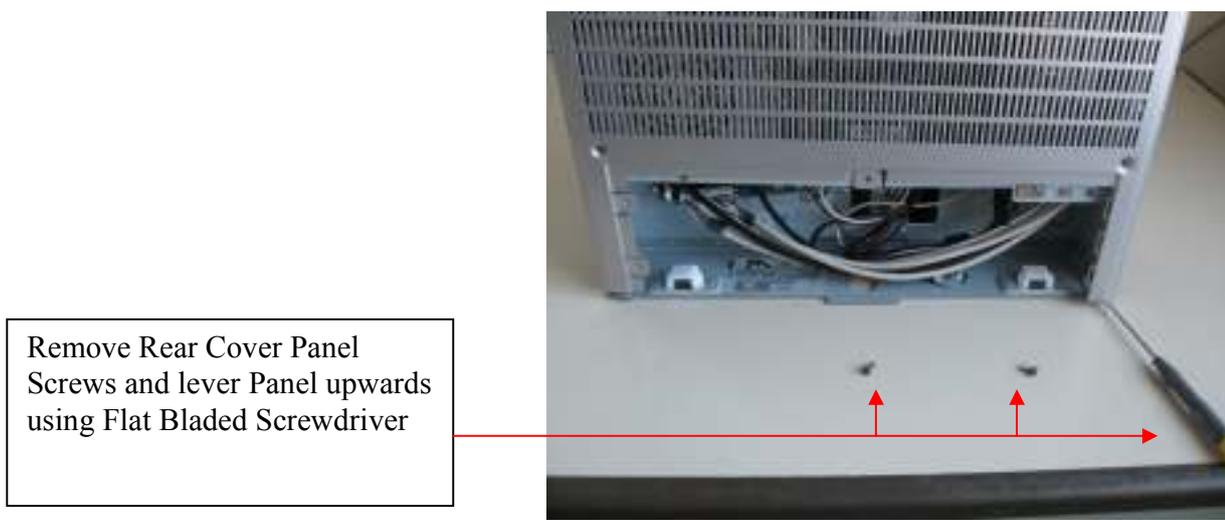

Fig 8

Classroom One Disassembly and Assembly Guide

Internal Module Access and Replacement

7. Rear Cover Panel removed (**Fig 9**) showing internal Module layout.

Fig 9

Classroom One Disassembly and Assembly Guide

Harddisk Removal and Replacement

8. Remove Cave Door and Rear Cover Panel as described sections **Fig 6** through to **Fig 9**. The Harddisk will need to be removed in either of the following situations: Harddisk Replacement, PSU replacement and Optical Drive replacement. The Harddisk is secured to the Chassis by 3 x Phillips Screws, (**Fig 9**) and (**Fig 10**).

Fig 9

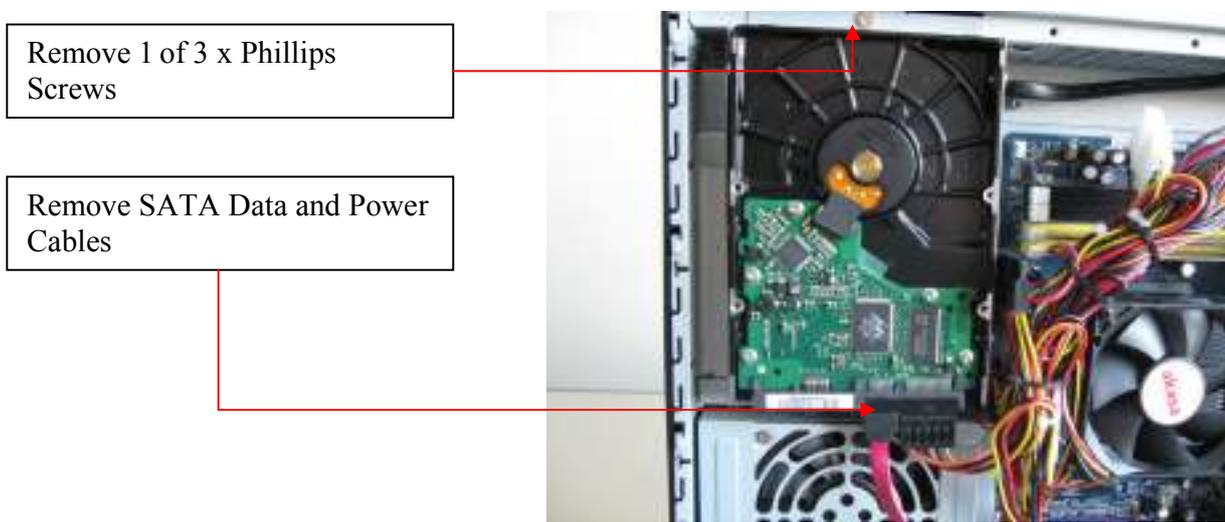

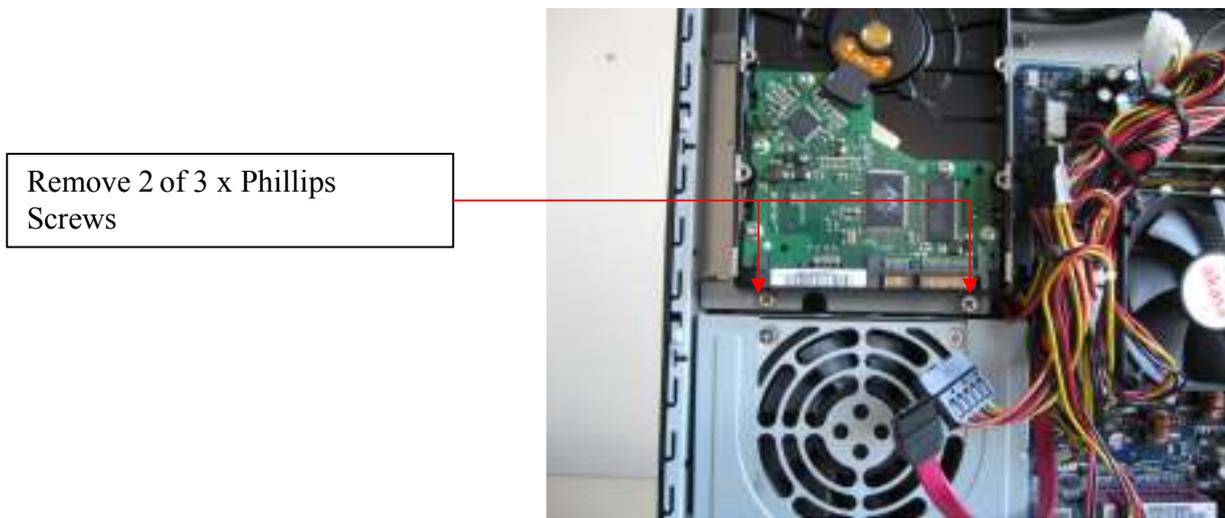

Fig 10

Classroom One Disassembly and Assembly Guide

Harddisk Removal and Replacement

9. Harddisk removed from Chassis, picture shows drive inside drive cage. Release the drive from the cage by removing 2 x Phillips Screws from one side of the drive and un-hooking it from the other (**Fig 11**). Replace Harddisk following this procedure in reverse.

Fig 11

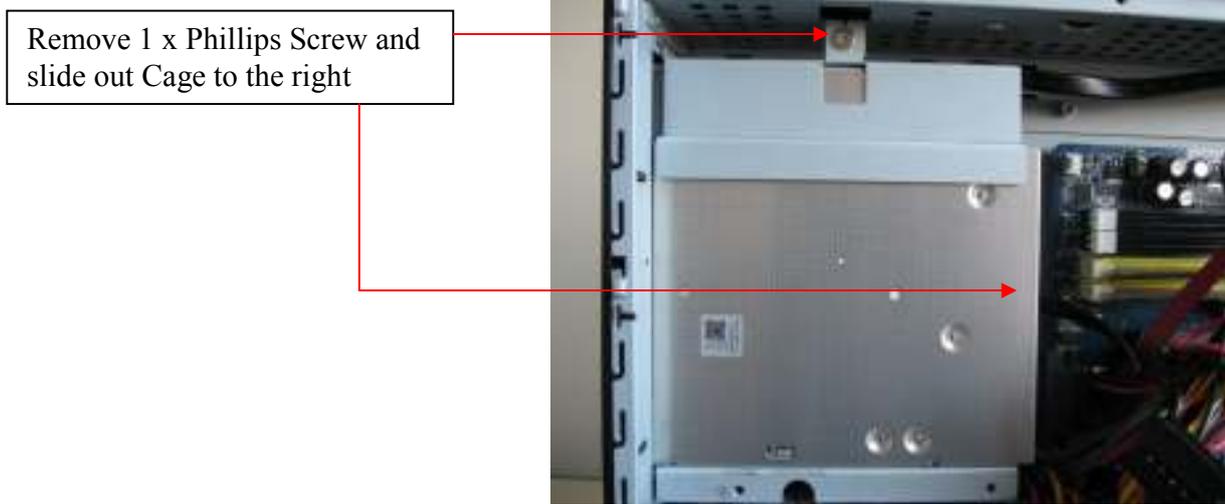

Classroom One Disassembly and Assembly Guide

Optical Drive Removal and Replacement

10. Remove Cave Door, Rear Cover Panel and Harddisk following this Procedure. Remove Phillips Screw securing Optical Drive Cage to Chassis and slide to the right removing Cage from securing lugs on Chassis, (**Fig 12**)

Fig 12

11. Optical Drive removed from Chassis. Picture shows drive inside drive cage. Release drive from cage by removal of 4 x Phillips Screws, two on each side of Cage, (**Fig 13**). Replace Optical Drive following this procedure in reverse.

Fig 13

Classroom One Disassembly and Assembly Guide

Power Supply Removal and Replacement

12. Remove Cave Door, Rear Cover Panel and Harddisk following this Procedure. Disconnect Cable Looms and remove 3 x Security Screws securing Power Supply to Chassis, (**Fig 14**). Lift out Power Supply from Chassis, (**Fig 15**).

Fig 14

Remove 3 x Security Screws

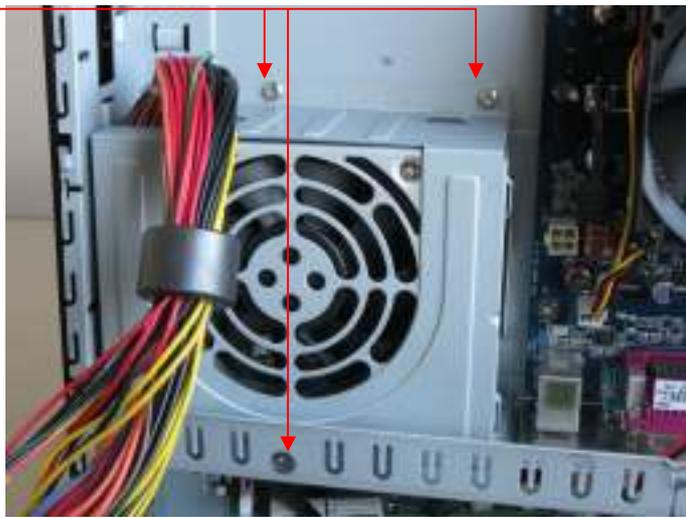

Fig 15

Power Supply removed from Chassis + Remove PSU from cage and refit to replacement PSU.

Classroom One Disassembly and Assembly Guide

Front USB, Firewire, Audio PCB Removal and Replacement

13. Remove Cave Door, Rear Cover Panel following this Procedure. Remove 4 x Security Screws securing Front, Firewire, Audio PCB to Chassis, and disconnect Cable Looms (**Fig 16 and Fig 17**). Lift out PCB from Chassis.

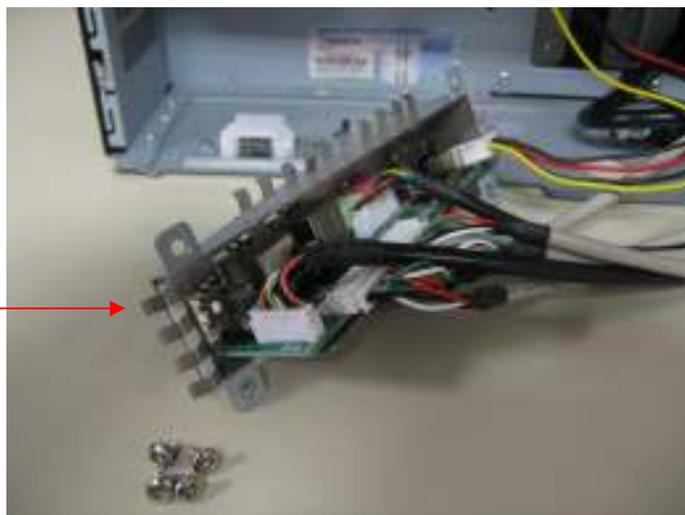

Fig 16

Front USB, Firewire, Audio PCB

Fig 17

Front USB, Firewire, Audio PCB removed from Chassis

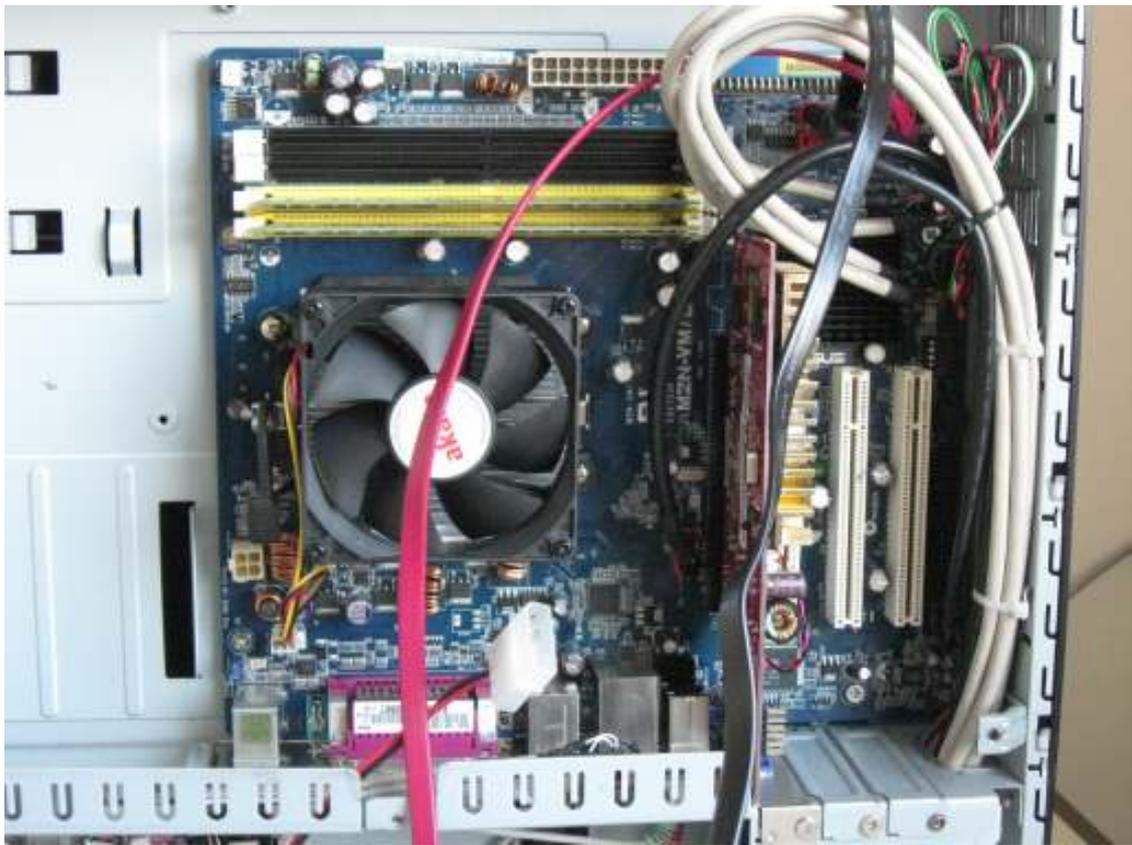

Classroom One Disassembly and Assembly Guide

Mainboard, CPU, Fan and Memory Removal and Replacement

14. Remove Cave Door, Rear Cover Panel following this Procedure. Mainboard, CPU, Fan and Memory would be the same as any standard Desktop PC from this point.

Fig 18

Classroom One Disassembly and Assembly Guide

Hinge, Column and VGA USB Audio Cable Loom Removal and Replacement

15. To remove Hinge, Column or Cable Loom first remove LCD Screen Module as described earlier in this Procedure. Then remove 6 Security Screws from Hinge Column Cover Panel and Hinge Plate, (Fig 19 and 20).

Fig 19

Hinge Column Cover reverse side. Remove 4 x Security Screws

Fig 20

Hinge Column Cover front side. Remove 2 x Security Screws

Classroom One Disassembly and Assembly Guide

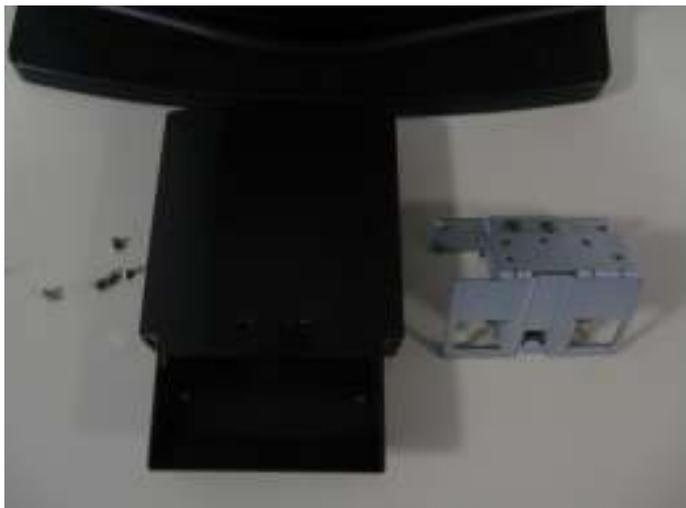

Hinge, Column and VGA USB Audio Cable Loom Removal and Replacement

16. Hinge Column Cover Panel and Hinge Plate removed, (Fig 21 and 22).

Fig 21

Fig 22

Classroom One Disassembly and Assembly Guide

Hinge, Column and VGA USB Audio Cable Loom Removal and Replacement

17. To remove Column, first remove the LCD Screen Module. Then remove Hinge Column Cover Panel, Hinge Plate, Cave Door and Rear Cover Panel as described earlier in this Procedure. The Column is secured to the Chassis using 2 x Phillips Screws and 4 x Security Screws.

Fig 23

Tie Rap needs to be removed when removing Hinge Column or Cable Loom
